Due to the limitations of the printing process color samples shown here may not be exact, consult your representative prior to ordering.

# a different view of woodgrains and colors

## The wonder of woodgrain...

Now there's no need to turn your back on the lustrous look of wood when you choose the luxury of modern materials. State-of-the-art foil technology means the appearance and even the texture of beautiful natural woodgrains and colors can be made more lifelike than ever while the bonded surface complements all the well-known benefits of PVC.

It hardly needs to be said that our woodgrains are far less like wood in a few other ways in that they will not rot, warp, crack or need painting.

Choose from the classical and luxurious golden oak or the demure subtlety of mahogany. The versatility of this modern material even gives you the option to choose any woodgrain for the outside surfaces and brilliant white for the inside or choose a laminate for the the outside and the inside to accommodate the interior and exterior architecture of you home or building.

Please consult with your EUROWIND Representative our Customer Call

Center for accurate leadtimes on any Woodgrain and color.
